Energy Solutions

Energy at work

FORTIS BC™

Your energy company and much more

Regionally-integrated energy systems

Energy conservation steps today

What can you do to help?

Turn down the heat at work

- Reduce temp in buildings to 15-18 degrees C
- Drop temperatures in unoccupied buildings
- Avoid use of optional gas equipment

Turn down the heat at home

- Wear a sweater or use a blanket
- Take shorter showers

Helping lead the way...

Innovation that generates opportunities & solutions for your community priorities.

- Renewable Natural Gas
- Carbon Capture
- Ongoing innovation

Renewable Natural Gas

Helping BC communities to do their part for the environment while benefiting their local industries

City of Surrey Biofuel Facility

Surrey Biofuel Facility storage tanks, fermenter, and biogas buffer.

"By working with FortisBC, we can add Renewable Natural Gas from the new biofuel facility to the distribution system already in place, and then draw it out where we need to fuel. It gives us great flexibility and efficiency while reducing our carbon footprint."

Rob Costanzo, General Manager,
Corporate Services, City of Surrey

Virtuous cycle
