

Alta Injection Molding is a controlled goods manufacturer. We can produce goods that have military and/ or national security importance – they are regulated by Canadian federal law and ITAR.

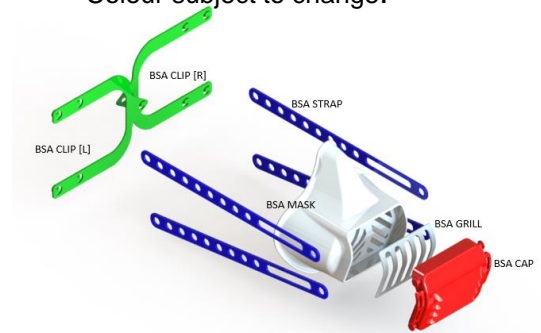

A washable and reusable mask designed and manufactured in Alberta. This easy to use product provides a safe and cost effective solution for both employees and the general public. The mask is made from Medical and FDA approved Polymers that allow the user to wash after use ensuring their PPE is ready when required. The main body of the mask is a soft polymer that is designed for a full face seal while feeling soft on the skin. A space is available for the installation of filters from simple fabric to N-95 ratings.

- Unique washable & re-usable face mask.
- Made with FDA approved polymers.
- N-95 certified.
- Soft full face seal with adjustable straps for easy fitting.
- Includes 3 reusable/washable filters.
- Each filter good for up to 10
- Storage and maintenance instructions included.

Colour subject to change.
